1 Introduction

This report presents the details of surplus materials currently available at the project sites. The document provides a summary of the materials, including descriptions, specifications, quantities, and project. The purpose of this report is to record the available surplus at the EMPG project site so that they can be used in other projects.

6 Surplus Consumption Analysis

During Feb'26, surplus material valued at **Rs. 2.1 Cr** was identified across projects. Of this, material worth **Rs. 0.27 Cr** from the **Buildings Vertical** was successfully redeployed to various sites, resulting in effective inventory utilization. The surplus consumption value for May'26 is currently under consolidation and will be reported in the next quarter's report.
